Reasons for allowance

The following is an examiner's statement of reasons for allowance: Applicant's responses on September 16, 2003 (the metal-containing compounds of Prendergast (WO 99/53532) are part of an oxidizing solution and are described as being water-soluble so that copper dissociate into its ionic form (Cu^{2+}) in a water-based solution to serve as a catalyst in the formation of hydroxyl radicals that serve as an oxidant in the slurry taught in Prendergast. Water-soluble copper-containing compounds would not operate as an abrasive having a hardness such as that of brass. This is because the hardness of a material is dependent on the chemical composition of the abrasive in its non-dissociated state) are deemed persuasive to overcome the previous 35 U.S.C. 103 (a) rejections.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
